This document is designed to assist North Carolina educators in effective instruction of the new Common Core State and/or North Carolina Essential Standards (Standard Course of Study) in order to increase student achievement. NCDPI staff are continually updating and improving instructional tools to better serve teachers.

**Essential Standards: Fifth Grade Social Studies ● Unpacked Content**

For the new Essential Standards that will be effective in all North Carolina schools in the 2012-13.

**What is the purpose of this document?**
To increase student achievement by ensuring educators understand specifically what the new standards mean a student must know, understand and be able to do.

**What is in the document?**
The “unpacking” of the standards done in this document is an effort to answer a simple question “What does this standard mean that a student must understand, know and be able to do?” and to ensure the description is helpful, specific and comprehensive for educators. This tool also provides definitions and key terminology frequently used and identified within the North Carolina Essential Standards for Social Studies. Key terms in bold, correspond to those that would likely appear in the new standards, classroom instruction, and comprehensive assessments (formative, interim, and summative). You may also find a list of key terminology at the end of this document in Appendix A. This list is not meant to be exhaustive, but seeks to address key terms and definitions that are critical in building student knowledge and understanding in the content area. These terms should not be used for basic recall or memorization, but to enhance the student’s ability to make connections across other disciplines and in the real world.

**How do I send Feedback?**
We intend the explanations and examples in this document to be helpful and specific. That said, we believe that as this document is used, teachers and educators will find ways in which the tool can be improved and made even more useful. Please send feedback to us at feedback@dpi.nc.gov and we will use your input to refine our instructional tool. Thank You!

**Just want the standards alone?**

### Essential Standard:
5.H.1 Analyze the chronology of key events in the United States.

### Concept(s):
Conflict, Historical Understanding, Interaction, Compromise

#### Clarifying Objectives
5.H.1.1 Evaluate the relationships between European explorers (French, Spanish and English) and American Indian groups, based on accuracy of historical information (beliefs, fears and leadership).

#### Unpacking
What does this standard mean a student will understand, know and be able to do?

**The student will understand:**
- Interactions between different cultural groups can have both positive and negative effects.
- Interactions between different cultural groups are often shaped by perception.
- The accuracy of historical sources can be evaluated in a variety of ways.

**The student will know:**
- How European explorers and American Indian groups perceived and interacted with each other.
- The impact of trading networks on the relationships between Europeans and indigenous people.
- **Various historical tools** can be used to interpret perspectives and sources.

**The student will be able to:**
- Assess the validity of a historical source using a variety of interpretive tools.

**For example:** For an accurate understanding of the relationship between Europeans and American Indians, one might utilize multiple sources from varying points of view.

**Note:** This Clarifying Objective combines historical content and skill development. First, students will need to evaluate the relationship between Europeans and American Indians within the context of leadership, beliefs and fears. Next, students will need to assess the accuracy of available historical information about both groups.

**Key Terminology:**
- **Historical understanding**—requires that students engage in historical reasoning, listen to and read historical stories, narratives, and literature with meaning; think through cause and effect relationships; interview “old-timers” in their communities; analyze documents, photos, historical
5.H.1.2 Summarize the political, economic and social aspects of colonial life in the thirteen colonies.

The student will understand:
- Communities develop distinct identities based upon physical location, the cultural make up of the population and economic circumstances.

The student will know:
- **Daily life in the colonies** varied based upon the cultural background of the inhabitants.
- The impact geography had on the economic and cultural development of the thirteen colonies.

**For example:** New England colonies were largely farming and fishing communities. Middle colonies were part agriculture, part industrial. Southern colonies were almost entirely agricultural.

- How and why the political and economic structure among the colonies varied.

**For example:** Six of the original colonies (New York, North Carolina, South Carolina, Virginia, and New Jersey) were started as proprietary colonies. The purpose of these colonies was to make profit for stockholders back in England.

**Key Terminology:**
- **Political Freedom**- the right to participate freely in the political process choose and remove public officials, to be governed under a rule of law; the right to a free flow of information and ideas, open debate and right of assembly.
- **Economic Freedom**- the right to acquire, use, transfer and dispose of private property without unreasonable governmental interference; the right to seek employment wherever one pleases; to change employment at will; and to engage in any lawful economic activity.
- **Social organization**- the rule-governed relationships of individuals and groups within a society that holds it together.

5.H.1.3 Analyze the impact of major conflicts, battles and wars on the development of our nation through Reconstruction.

The student will understand:
- Conflict and compromise may drive a nation’s political, social, and economic development.
- Strategies may dictate the direction and outcome of wars.
- War can transform society.
The student will know:

- Examples of social, political, and economic issues that were a source of conflict and how those issues impacted the development of the United States through Reconstruction.

  For example:
  - Social: Slavery, American identity, reform movements, religious movements.
  - Economic: Slavery, tariffs, taxation, industrialization.
  - Political: Slavery, nullification, suffrage, citizenship

- How epidemics and disease impacted conflict.

- Examples of battles that started wars, ended wars, and were turning points in wars through Reconstruction (e.g., The Trail of Tears, Battle of Wounded Knee, the Battle of Gettysburg, the Battle of Yorktown).

- Significance of major wars (e.g., French and Indian War, American Revolution, War of 1812, Mexican War, Civil War) on the economic, social and political development of the United States.

Key Terminology:

- Economic development - actions taken to improve the ability of people to more productively use capital, natural and human resources in the production of goods and services.

- Political development - the development of institutions, attitudes, and values that form the political power system of a society.

- Social development - Pattern or process of change exhibited by individuals resulting from their interaction with other individuals, social institutions, social customs, etc.

5.H.2.1 Summarize the contributions of the “Founding Fathers” to the development of our country.

### The student will understand:
- Certain times and conditions often provide the opportunity for individuals to exhibit leadership that may change the course of history.
- Individual leaders can shape the political, economic and social development of a nation.
- Collaborative action among citizens can determine the development of a nation.

### The student will know:
- How philosophical writings (e.g., the writings of Paine, Locke, Rousseau, and Montesquieu, etc.) and the actions of the British government (e.g., the Proclamation of 1763, the Townshend Act, and the Stamp Act, etc.) encouraged the emergence of colonial leadership and the quest for independence.
- How thoughts, actions and individual personalities of leaders influenced the events and outcomes of the American Revolution (e.g., Thomas Jefferson and the writing of the Declaration of Independence, George Washington and the battles of Trenton and Yorktown, and Samuel Adams and the Sons of Liberty).
- How individuals collaborated in the shaping of the Declaration of Independence and the U.S. Constitution.
- How thoughts, actions and individual personalities of leaders influenced the decisions and outcomes of the Constitutional Convention (e.g., James Madison and the Virginia Plan, William Paterson and the New Jersey Plan, the writing of the Federalist Papers by Hamilton, Jay and Madison).
- How leadership influenced the political development of the early nation (e.g., the Federalist presidential administrations, the development of judicial review, the creation of the National Bank).

### Key Terminology:
- Founding Father- a person who founds or establishes an important institution, esp. a member of the US Constitution Convention (1787).
- Constitution- the system of fundamental laws and principles that prescribes the nature, functions, and limits of a government or another institution. The fundamental law of the United States, framed in 1787, ratified in 1789, and variously amended since then.

| • People may move to different places as a result of forced or voluntary action. | **For example:** immigration of Africans to the American South, Puritans to New England, Trail of Tears, Highland Scots to North Carolina, Germans and Irish to America, Chinese to the American West Coast.
The student will know:
- Various examples of migration and immigration.
- **Examples of push and pull factors** that lead to migration or immigration.
- Examples of societal issues that influenced individual or group decisions to leave or settle in a place.
- How political factors, like government stability or instability, influenced settlement patterns.
- Ways economic factors, like the availability of jobs or natural resources, influenced settlement patterns.

Key Terminology:
- **Push factors** - in migration theory, the social, political, economic and environmental forces that drive people from their previous location to search for new ones.
- **Pull factors** - in migration theory, the social, political, economic, and environmental attractions of new areas that draw people away from their previous location.

Economics and Financial Literacy

Essential Standard:
5.E.1 Understand how a market economy impacts life in the United States.

Concept(s): Trade, Innovation, Government, Markets, Economy

Clarifying Objectives

5.E.1.1 Summarize the role of international trade between the United States and other countries through Reconstruction.

Unpacking
What does this standard mean a student will understand, know and be able to do?

The student will understand:
- Nations trade with one another based upon their need for resources.
- Governments create policies that transform economic growth and development.
- National economies are often interdependent.
- National economies can limit or stimulate the direction of international markets.

The student will know:
- The role of supply and demand in a market economy.
- The role of **mercantilism** in the creation of the United States.
- How and why the United States developed trading partners.
Examples of major imports and exports in the United States through Reconstruction.

**Key Terminology:**
- **Mercantilism** - an economic policy under which nations seek to increase their wealth and power by obtaining large amounts of gold and silver and by selling more goods than they buy.
- **Market economy** - an economic system in which prices are determined by the free exchange of goods and services with minimum government interference.

5.E.1.2 Explain the impact of production, specialization, technology and division of labor on the economic growth of the United States.

**The student will understand:**
- The interconnectedness of labor, capital, and markets help contribute to the complexity of a nation’s economic system and may drive or limit opportunities for economic growth.
- A nation’s economic success may be linked to the resources it has access to and the goods and services it provides.

**The student will know:**
- Ways in which the economic growth of the United States is shaped by the interaction between production, specialization and division of labor.
- How factors of production influence the growth of a nation’s economy.

**Key Terminology:**
- **Economic growth** - the change in the level of economic activity from one year to another.
- **Production** - the act of growing, making or manufacturing goods and services.
- **Specialization** - the situation in which a nation produces a narrower range of goods and services than they consume/specialization in mass production occurs when a worker repeats a single operation over and over.
- **Division of labor** - The process whereby workers perform on a single task or very few steps of a major production task, as when working on an assembly line.

- Conflicting ideas can lead to debates and consensus about the nature of government.

**The student will know:****
- Where ideas about self-government originated.
- How ideas about self-government in other parts of the world influenced the development of the United States.

For example: Framers of the Constitution drew upon elements of the Iroquois Constitution, the Enlightenment, the Roman Republic and Athenian democracy.

**Key Terminology:**
- **Government**- an institution that determines and enforces a society’s laws. The size and nature of a government varies according to the society it governs.
| 5.C&G.1.2 Summarize the organizational structures and powers of the United States government (legislative, judicial and executive branches of government). | The student will understand:  
- Governments are structured to address the basic needs of the people.  
- Branches of government often involve a complex system of checks and balances.  

The student will know:  
- Organizational structures of the branches of the United States government.  
- Constitutional powers of each branch of the United States government.  
- How each branch checks and balances the others.  

Key Terminology:  
- Branches of government - established in the United States Constitution to divide the power of government between legislative, executive and judicial branches. |
| 5.C&G.1.3 Analyze historical documents that shaped the foundation of the United States government. | The student will understand:  
- A nation’s founding documents reflect its basic principles.  
- A nation’s political documents are often shaped by philosophical theories.  

The student will know:  
- Key founding documents (e.g., Declaration of Independence, Articles of Confederation, Federalist and Anti-Federalist Papers, the United States Constitution and various state Constitutions) and their influence on the United States government.  
- How the flaws of the Articles of Confederation led to the development of the United States Constitution.  
- How The Anti-Federalist Papers argued for a national Bill of Rights.  

Key Terminology:  
- Articles of Confederation - The first document created to govern the newly formed government after the American Revolution. It created a “firm league of friendship” among the 13 original states. The states agreed to send delegates to a Confederation Congress. Each state had one vote in Congress.  
- Federalist Papers - consists of 85 essays that were written and published during the years of 1787 and 1788 in several New York newspapers to ratify the proposed constitution.
