

Number and Operations

Goal: The learner will understand and compute with rational numbers

Objective:

1.01 Develop number sense for negative rational numbers.

c) Make estimates in appropriate situations.

Note: This objective covers only negative rational numbers, and 0, with the understanding that decimals (tenths, hundredths, thousandths) and negative fractions from 5th grade families are to be used.

To achieve this objective, students should:

- Estimate real-life situations such as outdoor temperatures and depth
- Estimate to the nearest benchmark with or without number line
