

Measurement

Goal: The learner will select and use appropriate tools to measure two- and three – dimensional figures.

Objective:

2.01 Estimate and measure length, perimeter, area, angles, weight, and mass of two- and three-dimensional figures, using appropriate tools.

To achieve this objective, students should:

- Estimate angle measures using benchmarks and find precise angle measures of two-dimensional figures using appropriate tools.
- Estimate length measures using benchmarks and find precise length measures of two-dimensional figures using appropriate tools.
- Estimate weight/mass measures using benchmarks and find precise weight/mass measures of three-dimensional objects using appropriate tools.
- Understand and find perimeter and area of simple and composite two-dimensional figures.
