

## **Geometry**

**Goal: The learner will understand and use properties and relationships in geometry.**

**Objective:**

**3.01 Using three-dimensional figures:**

- a) Identify, describe, and draw from various views (top, side, front, corner).**
- b) Build from various views.**
- c) Describe cross-sectional views.**

To achieve this objective, students should:

- Recognize and draw a 3-D figure from different views.
- Identify the different views of a 3-D figure.
- Describe the cross-sectional views of 3-D figures from a perpendicular and parallel cut.
