NCDPI State Board of Education Meeting December 2017

All Digital Learning Initiative Grant Applicants

Application Evaluation Process

In alignment with the NC State Board of Education Policy for Competitive Grants ([CNTR-001](#)), each application was evaluated using the following procedures.

- **Level I Evaluation** – Two review teams consisting of internal and external members were established for each grant type. One review team evaluated the Showcase Grant applications, and one review team evaluated the Planning Grant applications. Using their professional judgment, team members individually evaluated each application using the grant rubric and determined quality bands. After the evaluation by individual team members, each review team met to reach a team consensus on the final quality band rating, to develop comments on each proposal, and to make recommendation for the Level II Evaluation.
- **Level II Evaluation** – A team was established to review the grant applications and recommendations from the Level I Evaluation. This review team used the following criteria to align applications with specific funding priorities: State Board of Education and NCDPI priorities, geographic area needs, socioeconomic needs, the number of projects and total funding received, and applicant's prior performance. The review team made recommendations for the Level III Evaluation.
- **Level III Evaluation** – Based upon the recommendations and evaluations from the previous review teams, these evaluators determined final selections to recommend to the State Board of Education.

* Tier I District
** Charter School

Quality Band: 4 - Excellent
3 - Strong
2 - Average
1 - Weak
0 – Unacceptable
