

IHE Master's Performance Report

Elon University

2005 - 2006

Overview of Master's Program

The M.Ed. program at Elon University builds upon professional competencies of experienced classroom teachers. Candidates select a 33-semester hour program of study in elementary education, a 33-semester hour program in gifted education or a 36-semester hour program in special education (general curriculum). All candidates take core courses in research, testing and measurement, advanced psychological theory, and a capstone advanced graduate seminar. Core courses provide candidates with conceptual understandings including the logic of controlled research and the principles of statistical analysis, measurement concepts and the elements of sound test construction. These essential understandings are integrated with fundamental psychological principles of learning, development, and motivational theory. The advanced seminar gives candidates an opportunity to consider current trends and issues in education and their own future role as educational leaders. In addition to the graduate core, each of the programs of study has its own set of content specific courses. In Elementary Education, candidates examine the theoretical and philosophical basis for practices in education; study the organization patterns of the elementary school curriculum; and consider the changing roles and responsibilities of teachers in working with other professionals. The elementary core also provides candidates with opportunities to explore issues and techniques for working with candidates who have special learning needs so that their understanding of diverse learners is extended and deepened. The Gifted Education core provides candidates with opportunities to study curriculum development and instructional methods that are especially appropriate for students who are academically or intellectually advanced. Attention is given to populations that are underrepresented in gifted education and to the social and emotional needs of students who are gifted. The Special Education core concentrates on developing an advanced understanding of the legal and historical issues that drive special education. Candidates explore the research base for effective instructional and behavior management techniques and learn about recent assessment methodologies. A 6-semester hour internship gives special education candidates opportunity to apply advanced instructional skills. In addition to required and elective coursework, candidates complete a graduate portfolio as their culminating product of learning. The purpose of the portfolio is to give candidates the opportunity to demonstrate the characteristics, behaviors, understandings, and skills of master teachers. Required portfolio components reflect the five knowledge and skill areas identified in the standards for the master's license. The development of the portfolio is an integral part of the overall graduate experience. Candidates add products to their portfolio as they progress through the program and submit it for evaluation as a graduation requirement. Each portfolio is assessed by two independent evaluators selected from the faculty and school district personnel. Once approved, candidates present their

portfolios to peers, faculty, school district personnel, and invited guests during the final section of the Advanced Master's Seminar.

Special Features of Master's Program

Summer and Online Courses – The M.Ed. program at Elon University now offers all of its courses either during the summer (on campus) or during the academic year online. This course schedule gives teachers interested in pursuing a graduate degree the opportunity to do so in a timeframe that fits well with their professional schedules. Courses are taught in two three-week sessions during the summer and are purposefully scheduled to match start and end dates of local school district calendars. The Cohort Program is a special configuration of summer/online courses that gives candidates the opportunity to enter the program as a cohort in the summer and continue through two subsequent summers to complete the program in two years and two months. Candidates who enter as part of a cohort and remain with the cohort pay a substantially reduced tuition. Part of the impetus for setting up this special cohort program was to give Visiting International Faculty (VIF) the opportunity to obtain a Master of Education degree during their three-year teaching experience in the United States. While designed specifically to meet the scheduling demands of VIF, the program gives all candidates the opportunity to earn the M.Ed. in a timely fashion and at a reduced cost. Currently in the sixth year of this program, feedback from area teachers and enrolled candidates has been very positive and enrollment has increased dramatically. The cohort program gives candidates the opportunity to immerse themselves in graduate study and to form close, collaborative relationships with other teachers from nearby districts and around the world. The blend of local and international candidates enhances class discussions and broadens the perspective of all candidates.

Alternative Options – The Advanced Track (AT) option is designed for professionals with undergraduate degrees in fields other than education who seek both initial and advanced licensure. Candidates must complete specific prerequisites and a full semester of student teaching before being initially licensed. They may take some of their coursework at the graduate level while being initially licensed, then after two years of teaching experience, return to complete the requirements for the M.Ed. degree. The Alternative Pathway to Teaching (APT) Program is designed specifically for lateral entry teachers. These teachers have a bachelor's degree in a field related to their teaching field and have been provisionally licensed to teach, so they are teaching while enrolled in the program. Though these teachers are not necessarily seeking advanced licensure, some of their coursework is at the graduate level to provide them with an environment appropriate to their experience and post-baccalaureate status. They may apply their graduate coursework toward a master's degree should they decide to apply for and be admitted to Elon's M.Ed. program.

Personal Attention – A highly valued feature of Elon's graduate program is its focus on the individual candidate. Candidates are assigned a faculty advisor when they are admitted to the program. The advisor meets with the candidate regularly and advises candidates regarding elective choices, portfolio development, and other issues that may be of concern.

II. CHARACTERISTICS OF STUDENTS

A. Headcount of students formally admitted to and enrolled in programs leading to licensure.

Full Time				
	Male		Female	
Graduate	American Indian/Alaskan Native	0	American Indian/Alaskan Native	0
	Asian/Pacific Islander	0	Asian/Pacific Islander	0
	Black, Not Hispanic Origin	0	Black, Not Hispanic Origin	0
	Hispanic	0	Hispanic	0
	White, Not Hispanic Origin	0	White, Not Hispanic Origin	0
	Other	0	Other	0
	Total	0	Total	0
Licensure-Only	American Indian/Alaskan Native	0	American Indian/Alaskan Native	0
