

# IHE Master's Performance Report

Elizabeth City State University

2006 - 2007

---

## Overview of Master's Program

The Graduate Education Program at Elizabeth City State University is committed to contributing to the mission of the University by providing graduate-level programs to meet the diverse needs of the citizenry of northeastern North Carolina. With excellence permeating all of the activities, the program seeks to provide a challenging and supportive environment that prepares its students to compete and excel in an ever-changing technologically advanced society. The program is designed to develop research skills, problem-solving skills and to develop the skills, knowledge and experience necessary for professional employment, professional growth, and/or further graduate study. Small classes, personal interaction with faculty members, and an atmosphere conducive to pursuing academic excellence enhance the educational experiences and quality instruction received by graduate students.

## Special Features of Master's Program

The School of Education and Psychology offers the Master of Education in Elementary Education. A total of 36 credit hours are required to complete the Master's Degree Program. The primary goal is to ensure that teachers, through continuous decision making, become effective collaborators and leaders. The program's focus is to fully implement national standards for teachers, especially National Board for Professional Teaching Standards (NBPTS), while incorporating student standards. Merging these standards results in high quality education for P-12 students. The Master of Education in Elementary Education program seeks to fulfill its mission by preparing professional educators to: respond effectively to children's differences resulting from development, diversity, and exceptionalities; demonstrate knowledge of the content and pedagogy of the elementary curriculum; improve educational practice through reflection, self-evaluation, and applied research; and direct their own personal and professional growth as educators. The graduate level teacher education program at ECSU is a way for students to expand their knowledge, deepen their understandings, and sharpen the skills already acquired through their previous studies and professional experiences. Graduate studies in teacher education are focused, personalized, and characterized by academic rigor and professional relevance. The importance of technology for instructional purposes is evidenced and supported by technology rich classrooms and up-to-date technology labs. In addition to offering a Master of Education in Elementary Education Program, ECSU also offers a Master's Degree Program in School Administration. The Master of School Administration is interdisciplinary in scope and offers students both full-time and part-time (extended time) options. This program of study closely links theory to practice in ways that will enrich students, local educational agencies (LEAs), regional, national, and global communities. As required by all other Master of School Administration programs within the UNC System, our courses are aligned with the North Carolina Standards and ISLLC Standards. This program is designed to address the need for "qualified" school leaders in Northeastern North Carolina. The School of Mathematics, Science,

and Technology has two Master’s Degrees: Master of Science Degree in Biology and Master of Science Degree in Mathematics. The Master of Science Degree in Biology provides opportunities for advanced study in the biological sciences and to pursue research investigations in specialized areas of interest. The formal course work and research in the life sciences provide the depth required for further graduate study or for careers in industry, government or secondary/community college teaching. The Master of Science Degree in Mathematics provides a concentration in Mathematics Teaching, Applied Mathematics and Remote Sensing. The program provides a broad base of formal course work and research in mathematics. This program is designed to provide breadth of exposure in mathematics and to enhance the intellectual attitudes and the analytical skills needed for the comprehension, appreciation, creation, application and teaching of mathematics.

## II. CHARACTERISTICS OF STUDENTS

### A. Headcount of students formally admitted to and enrolled in programs leading to licensure.
