Western Carolina University
2008 - 2009**

Overview of Master's Program

Western's masters program leading to professional education licensure include: MAEd in Comprehensive Education (with fifteen concentrations), School Counseling; MAT in Comprehensive Education (with twelve concentrations); MA in School Psychology (NASP approved); and, MS in Communication Science and Disorders. All programs are located in the College of Education and Allied Professions and Graduate School except for the MS in Communication Science and Disorders which is now located in the College of Health and Human Sciences (and Graduate School). The MAEd program in Comprehensive Education is designed for experienced educators. The other masters degrees are for entry level educators although they meet advanced competencies. All programs require baccalaureate degrees from accredited institutions and standardized exam scores for admission. Some have additional requirements such as current licenses, portfolios, interviews, and writing samples. All have clinical components including a culminating internship and all require a culminating demonstration of competencies such as a portfolio and/or a written comprehensive examination. All programs are aligned with state-approved guidelines and competencies. All programs are available to students on a fulltime or part-time basis. Some programs are available in their entirety in Cullowhee and in Asheville. Others are available only in part in Asheville. Two of the programs, School Counseling and Communication Science and Disorders, have capped enrollments and are accredited by the relevant specialty area association, CACREP and ASHA respectively. Both agencies conduct on-site reviews. Faculty members in all of the programs have graduate faculty status and are active in their respective areas. Teaching formats include a wide range from traditional classroom delivery to web-enhanced courses, interactive television distance learning, and online courses. Some programs offer weekend formats, compressed formats, special scheduling, and back-to-back course scheduling.

Special Features of Master's Program

General characteristics of the Masters Program are discussed in the Overview. Special features of the masters programs will focus on the MAT and the MAEd in Comprehensive Education. The Master of Arts in Teaching was developed for individuals with non-professional education degrees who aspire to an advanced degree leading to teaching licensure. The MAT in Comprehensive Education includes twelve concentrations with a common core of professional studies and requires 36 –42 semester hours. The MAT continues to be revised at least annually as needed to meet the needs of stakeholders. Advisors in content areas determine the relevant courses needed at the graduate level based on undergraduate experience making each degree individually tailored. Some students may need undergraduate prerequisite courses. The MAT requires clinical experience based on the experience and circumstances of the individual (e.g., documentation of prior teaching experience, lateral entry status). All students are required to demonstrate achievement of advanced competencies with a portfolio including advanced proficiency in clinical experiences. Often individuals participating in the alternative licensure program pursue the MAT. The MAT in Special Education is now completely online and several concentrations are moving towards more online courses. The Master of Arts in Education in Comprehensive Education was revised within the last four years for teachers with a current license in the area of concentration. The program extends INTASC standards and was built upon the core propositions of the National Board for Professional Teaching Standards and designed to lead to National Board Certification. In fact, teachers who earn National Board Certification before completing the degree are exempt from the culminating portfolio requirement for the degree having already successfully demonstrated advanced competencies. The current MAEd in Comprehensive Education shares a common core with courses in diversity and leadership and a required

methods course taught in the discipline. Fifteen concentrations are offered, including birth-kindergarten, elementary education, gifted education, middle grades education, art, music, physical education, English, social sciences, chemistry, biology, mathematics, English as a Second Language, and special education (with emphases in learning disabilities, intellectual disabilities, behavioral disorders, and severe disabilities).

F. Satisfaction of program completers/employers with the program in general and with specific aspects of the program, as rated on a 1 (lowest) to 4 (highest) scale.

Due to low response rates, survey results have not been reported at the institutional level for any institutions this year.
