

IHE Bachelor Performance Report

St. Andrews Presbyterian College

2010 - 2011

Overview of the Institution

St. Andrews Presbyterian College in Laurinburg, North Carolina, is a four-year, church related, co-educational liberal arts and sciences institution founded in 1958 by the merger of Flora Macdonald College, a four-year college, and Presbyterian Junior College. The 600-acre campus is designed around its own lake and provides the perfect community environment. With both residential and non-residential undergraduate programs, the College serves traditional and non-traditional students from diverse international, ethnic and socio-economic backgrounds. One of the first barrier-free campuses, the College takes particular pride in its historical commitment to accommodating students with physical challenges. The College offers eighteen departmental and interdisciplinary majors on the Laurinburg campus. In addition to the established majors and pre-professional programs, the curriculum offers experiential and service learning through internships, guided independent study, interdisciplinary courses, and international travel/study opportunities. Through its integrated core curriculum, the College seeks to graduate informed, articulate individuals, able to live and work productively in an expanding global community. St. Andrews also offers evening and weekend classes leading to a Bachelor's degree through the St. Andrews, Sandhills Campus Program, which uses the facilities of Sandhills Community College in Pinehurst, North Carolina. Students enrolling in the program must have completed a Bachelors degree, an Associate's degree, or a minimum of 60 acceptable semester hours credit. The Elementary Education program is the largest of the four degree programs offered on the Sandhills campus. St. Andrews Presbyterian College is one of twenty colleges in the Mid-Atlantic region referred to as "hidden gems" by the Washington Post. St. Andrews is also featured in Jay Matthews' book, *Harvard Schmarvard: Getting Beyond the Ivy League to the College That is Best for You*.

Special Characteristics

The St. Andrews Teacher Education program prepares Learner-Centered Professional Teachers who believe in and demonstrate in practice that teachers are the single most important factor outside the home environment in affecting student learning and development. St. Andrews employs highly qualified adjuncts who assisted the regular faculty in instructional delivery. The Department of Education also has support from in-service teachers in the region who teach part-time at the College and serve as consultants for the Teacher Education Program. In addition to teaching professional education courses on the Laurinburg campus, all full-time faculty in the Department of Education teach courses on the Sandhills campus. All teacher education majors complete field experiences in classroom settings beginning with introductory courses through methods courses. Students use this opportunity for observation, one-on-one tutoring, and small group instruction. Teacher Candidates complete a fourteen-week student teaching placement in one setting, with the opportunity to observe and teach in classrooms at other levels during the last two weeks. The Department of Education's full-time faculty supervises Teacher Candidates during their student teaching experience.

Program Areas and Levels Offered

St. Andrews Presbyterian College offers degree programs for preparation of teachers in Elementary Education, K-6 and Physical Education, K-12. An Elementary Education and Physical Education licensure program is offered for students with BA/BS/MA degrees.

I. SCHOOL/COLLEGE/DEPARTMENT OF EDUCATION (SCDE) INITIATIVES

A. Direct and Ongoing Involvement with/and Service to the Public Schools

LEAs/Schools with whom the Institution Has Formal Collaborative Plans	Priorities Identified in Collaboration with LEAs/Schools	Activities and/or Programs Implemented to Address the Priorities	Start and End Dates	Number of Participants	Summary of the Outcome of the Activities and/or Programs
St. Andrews college Department of Education has formal collaborative agreements with Marlboro County Schools, Montgomery County Schools, Moore County Schools, Richmond County Schools, and Scotland County schools.	I. To assist with literacy and science achievement for students in grades 1 and 5. The rationale for this priority one (1) was to assist teachers as they worked with students who needed extra help. Students at this particular school did not do well on their end-of grade-tests in science in grades 5. Children in grade 1 were also behind in their literacy development. II. To assist teachers with science activities for grade 5 students. This	I. Department of education faculty and education majors worked with a low performing school to assist with literacy and science achievement for first and fifth grade students. Students were identified at a level 2 in reading and similarly, fifth grade students scored low on benchmark tests in science. There were 4 teachers, 12 education majors, ten first graders, and 12 fifth graders who participated in the semester long activities. An education	I. Tutoring started in February, 2010 and ended in April 2011. II. "Project Wild" was an all day workshop in October lasting 8 hours. "Aquatic Wild" was an all day workshop in March lasting 8 hours. III. At-risk after school programs began in January and lasted until mid April, 2010 IV. Committees met during the 2001-2011 academic	I. We began with 22 students and ended with 22 students. II. A total of 4 teachers and 22 students participated. III. There were 22 students identified as at-risk who started the program. Ending number was 22. IV. All five education faculty members participated in service projects.	I. Informal assessments and End of Grade assessments showed all 10 first graders achieved higher scores in yearly growth. On the EOG assessment for science only 4 students showed a higher performance grade, and that was marginal. II. Teachers reflected on how students reacted to the hands-on-activities. At a final meeting, teachers shared their reflections, and collaborated

	<p>was priority 2 because teachers wanted hands-on ideas that would meet the NC Standard Course of Study plan and give students help on the end of grade tests. III. To assist in after school programs for at risk students, while giving education majors an opportunity to work directly with students either one-to-one or in small groups. The rationale (3) for this priority was to give the extremely low performing students intensive remediation in order to help them pass the EOG tests. These are students who have been behind in school since the day they entered Kindergarten. With one-on-one help and following Marie Clay's program of study for</p>	<p>faculty member conducted 2 all day workshops using environmental science and hands-on activities that corresponded to the NCSCS for Science. Several teachers and education majors participated. III. A department faculty member worked with representatives from this school to assist in after school programs for at risk students. Students volunteered to tutor in after school programs. An education faculty member provided support and training for the student volunteers and coordinated the activities between the schools and the student tutors. IV. Education department faculty members assisted districts and local schools with service on</p>	<p>year.</p>		<p>by sharing additional science activities. Teachers responded positively with such comments as: "My students started looking forward to science time", "Some of the students followed up on the activities by doing additional internet searches on the topics", "I will use more of these activities next year, if I'm here". III. Education majors administered short term assessment measures to determine change in student performance. They reflected on their tutoring experiences and the need for intensive help for "at-risk" students. EOG results were analyzed</p>
--	---	--	--------------	--	---

	<p>intensive intervention, our education majors hoped to make a difference with this group of students. Teachers supported any extra help they received. IV. Assist districts and local schools with service on committees and in-service support for teachers and new teachers when necessary. The rationale for our faculty serving on various committees was so that we would continue to stay in close contact with our schools, and to support teachers' efforts in helping children. We become closer as a community as we work together to make schools a better place for students and adults alike.</p>	<p>committees and in-service support for teachers and new teachers when necessary. Committees included Jobs-Ready Advisory Board, Teaching Fellows, Science Olympics participants, and others named in narrative B.</p>			<p>to determine other potential changes in performance, however; the final results are not yet known. Teachers pointed out that several students showed a greater interest in their school work during the time they were being tutored. IV. Each faculty member was asked to continue to serve on their respective committees for the coming 2011-2012 academic year.</p>
--	--	---	--	--	--

B. Brief Summary of faculty service to the public schools.

Faculty and administrators across the college volunteered to serve local school districts by volunteering time in schools, serving as tutors, consultants, and helping to coordinate special events and educational programs. Services also included: reading to students in elementary and primary schools. The Art Department faculty judged art contests in Scotland County Elementary Schools, the Department of Theatre and Drama conducted summer camps for middle school students from Scotland County. The Scottish Heritage Center, located in its new facility, offered programs for school children. A Department of Education faculty member and a college administrator served on the Job Ready Advisory Board at Scotland High School and Business/Education Partnership Steering Committee. A Department of Education faculty member served on the Scotland County Schools' Strategic Planning Task Force and the Advisory Board for the Scotland County Partnership for Children and Families (SMART START). One faculty member served as a judge for the Teaching Fellows Program. Workshops in reading, math and science were provided by various faculty members for the partnership school districts.

C. Brief description of unit/institutional programs designed to support beginning teachers.

Department of Education faculty members worked with first year teachers who have completed program requirements at St. Andrews by visiting their classes, observing, and providing support. The Department of Education also responded to requests from area school districts to support beginning teachers who completed teacher education requirements at other colleges. In response to requests by public school personnel directors and beginning teachers in the region, the Department of Education provided test preparation materials for Praxis II tests in the teacher education curriculum lab, opened at convenient times for beginning teachers in partnership districts. Faculty were available to meet with beginning teachers and lateral entry teachers preparing for the tests.

D. Brief description of unit/institutional efforts to serve lateral entry teachers.

St. Andrews Presbyterian College provides opportunities for those students in the lateral entry program through courses on the Laurinburg campus and a satellite program using the facilities at Sandhills Community College. This program is referred to as CAPS, Center for Adult Professional Studies. A significant number of courses are offered at night and online for lateral entry students and for students needing to fulfill plans of study through the NC Regional Alternative Licensing Center (RALC). The Sandhills program allows students to complete their coursework in the evening, online and on weekends while still teaching during the day. It also provides students an opportunity to fulfill plans of study through the RALC. The Director of CAPS on the Sandhills campus disseminates information about the program, answers questions about program requirements and meets with the Department of Education Chair to review student records. The Elementary Education Program on the Sandhills campus offers a full schedule of required courses. On the main campus, the Licensure Officer is the first point of contact for lateral entry teachers seeking information about the program. The Department of Education maintains a close working relationship with the county coordinators for provisionally licensed teachers to better serve lateral entry teachers by providing letters of documentation, licensing requirements, and consultation. Department of Education faculty provides support for lateral entry teachers by visiting classrooms, by providing instructional materials, and by

assisting in the development of instructional activities for the classroom. Lateral entry teachers enrolled at St. Andrews use the Praxis study materials available through the Teacher Education Curriculum Lab.

E. Brief description of unit/institutional programs designed to support career teachers.

St. Andrews is an undergraduate institution with a very limited number of courses available to career teachers and/or those seeking licensure renewal. St. Andrews supports career teachers by offering participation in the yearly "Project Wild" and "Aquatic Wild" Workshops. Career teachers are able to receive CEU credits for their participation. Career teachers receive CEU credits for serving as Cooperating Teachers for our Teacher Candidates. The Teacher Education Curriculum Lab is a resource center open to career teachers. The Center offers a variety of resources such as videos, children's books, instructional manuals, resource texts, software, and units of study. The College's facilities (computer labs, science labs, the Scottish Heritage Center, Morgan Theatre, Avinger Auditorium and the physical education center) provide teachers a place to offer special programs for their students that cannot be replicated in a regular classroom. Successful career teachers are invited to speak to pre-service teachers to share their "real-world" experiences and provide strong models for good teaching. Department of Education faculty members serve as speakers for seminars and professional meetings attended by career teachers.

F. Brief description of unit/institutional efforts to assist low-performing, at-risk, and/or priority schools.

One faculty member worked with one of the Scotland County Schools to place college tutors with at-risk children in after school programs. The students' scores on EOG's will be evaluated for progress. This program will continue into the next academic year. Two faculty members assisted education majors who were tutoring students in grades one and five. At this time not all scores are known; however fifth grade science scores at this school are known. Science scores jumped from 54% proficiency to 74 % proficiency. This is very encouraging since St. Andrews education majors spent the better part of a semester tutoring fifth grade students in science.

G. Brief description of unit/institutional efforts to promote SBE priorities.

The Department of Education informs Education majors regularly during meetings, seminars, and classes to keep them advised of changes and revisions in the state education curriculum and assessment process. Students are apprised of State Board of Education actions and minutes. Efforts are made to keep the students aware of changes that are taking place in the areas of content, skills, and dispositions and how they relate to the revised Standards and Indicators both in Elementary Education and Physical Education. Electronic Portfolios are required by Teacher Candidates as evidence that they know, understand and implement lessons and strategies that accomplish the NC CORE Standards, Essential Standards, and the NCSCS.

H. Special Emphasis for the Year of Record (which of the above [if any] did you put special emphasis on from the preceding year).

During the 2010-2011 reporting year, the Department of Education continued emphasis on increasing Collaborative activities with partnership school districts. The Department has built a strong partnership with the area school systems and will continue to strengthen these partnerships. The school districts were involved in providing more input into the department's program re-visioning process. This committee met four times a year in a formal setting to review programs and course offerings. The CAPS director of the St. Andrews at Sandhills Campus Program diligently works at advertising and recruiting Teacher Education Candidates. The Department of Education collaborates with the NC Regional Alternative Licensing Center (RALC) to enroll students in courses to help complete their plans of study. Through the increased enrollment of Associate Degree or other degree students, the Department of Education has had the opportunity to work closely with school systems in the vicinity of the Sandhills Program; Montgomery County, Lee County, Chatham County, Hoke County, Moore County, and Richmond County. The Department of Education revised the summer school offerings in an effort to reach more pre-service and inservice teachers by offering several additional education courses online.

Supplemental Information (Optional)

I. Brief description of unit/institutional special efforts to improve NTE/Praxis scores.

Students entering the teacher education program are encouraged to participate in a semester long course offered by the Department of Education to prepare students for the PPST. The Department Chair has assigned individual faculty to serve as instructors for each of the three PPST exams. The course is offered during the fall and spring semesters. Information regarding the PPST is integrated into EDU 250: Education, Culture and Diversity, the beginning course for all education majors. If a student is unsuccessful on one or more of the exams, he/she is directed to the instructor for additional help and to his/her faculty advisor for further test skill strategies. Faculty provide one-on-one help sessions for students who must repeat a test. Preparation for Praxis II licensure exams occurs throughout various courses in the program. Faculty designed lessons in the methods courses provided assignments, test questions, and writing samples to model the Praxis II exam questions/prompts. In some instances a tutor is available to tutor one on one.

J. Brief description of unit/institutional special efforts to recruit students into professional education programs leading to licensure.

The Department of Education is committed to encouraging students to enter the teaching profession. Faculty members who teach education courses that are open to all St. Andrews students and a child development course in the Psychology Department encourage students to consider a career in education. The presence of the St. Andrews Elementary Education Program on the campus of Sandhills Community College provides the Department of Education with an opportunity to recruit students enrolled in college transfer programs. The CAPS director of the St. Andrews at Sandhills Campus Program has increased interest in the program through marketing, recruiting at community college days, and accessibility. The evening, online, and

weekend courses at St. Andrews at Sandhills, has attracted many teacher assistants to complete degree requirements for licensure. The Department of Education works closely with community college students as they select college transfer courses to meet teacher education requirements. A strong relationship with principals and personnel directors in our region of North Carolina has resulted in non-certified personnel being encouraged by employers to enroll in the teacher education program at St. Andrews. The Office of Admissions at St. Andrews conducts recruiting efforts with various community groups.

K. Brief description of unit/institutional special efforts to encourage minority students to pursue teacher licensure.

The Department of Education is committed to preparing a diverse teaching force for the classroom. St. Andrews is proud of its historical commitment to accommodate students with physical challenges. In addition, the recruitment efforts through the community colleges previously described offer an opportunity to recruit a diverse student body. St. Andrews is located in a region of the state that provides opportunities to recruit from diverse ethnic populations such as African-Americans, Hispanics, and Native Americans. St. Andrews annually hosts a conference of African-American Presbyterian Churches. The conference brings African-American Presbyterian church leaders from the Coastal Carolina Presbytery to the Laurinburg campus and includes the participation of a large number of middle and high school students. Potential students are made aware of the Teacher Education Program at St. Andrews. St. Andrews faculty advise minorities in teacher assistant roles in local school districts about pursuing an educational degree built upon their associate degrees in early childhood.

L. Other (if applicable): Brief description of new initiatives (if any) not detailed previously in the narrative section.

The Department of Education has expanded the role of its Educational Partnership Committee. Four formal meetings are held each year to assess our data, collect input, and utilize feedback from our partner school districts. Two faculty members are in the process of writing "blueprints" for two new programs to be offered through the Education Department. These new program offerings will go to the NC Department of Public Instruction for approval during the fall of 2011.

II. CHARACTERISTICS OF STUDENTS

A. Headcount of students formally admitted to and enrolled in programs leading to licensure.

Full Time				
	Male		Female	
Undergraduate	American Indian/Alaskan Native		American Indian/Alaskan Native	
	Asian/Pacific Islander		Asian/Pacific Islander	
	Black, Not Hispanic Origin		Black, Not Hispanic Origin	
	Hispanic		Hispanic	
	White, Not Hispanic Origin		White, Not Hispanic Origin	2
	Other		Other	
	Total		Total	2
Licensure-Only	American Indian/Alaskan Native		American Indian/Alaskan Native	
	Asian/Pacific Islander		Asian/Pacific Islander
