

IHE Master's Performance Report

Wake Forest University

2014 - 2015

Overview of Master's Program

The primary mission of the graduate Teacher Education Program is to provide Master's Degree programs with coursework and supervised field experiences to assist teacher candidates or experienced teachers in becoming teacher leaders. The department works closely with colleagues both at the university and in the public schools. The Department of Education has defined its Conceptual Framework and described these guiding principles in clear candidate performances. These principles concretely capture for us, our public school colleagues, our university colleagues, and Wake Forest students our sense of purpose. The department's goal is to infuse these principles into its students and integrate them into every aspect of the program. The guiding principles are defined by language shared with the North Carolina Professional Teaching Standards Commission and 21st Century Skills and thus have wide currency across the state. In addition, the knowledge base for the Emerging Teacher Leaders Conceptual Framework embraces the research supporting the INTASC and NBPTS standards. Because each of the principles is crucial to the high level performance of Wake Forest's students and the effectiveness of the Teacher Education program, the department integrates each area in the daily activities and performance indicators of the masters program. To do this we have created an assessment cycle that ensures continual improvement and extends from the application of graduates to our program through their completion.

Special Features of Master's Program

Wake Forest University offers two graduate programs in Education. Students may earn licensure in Secondary Education and K-12 French or Spanish through the Master Teacher Fellows program. The Master Teacher Fellows program is a thirteen-month program that attracts graduates who have not earned a license to teach. Candidates who complete the program earn a MAEd and a license. Generous financial aid is available to these students. During the course of the thirteen-month program, students complete graduate courses in their disciplines, rotate through internships with outstanding public school teachers, and complete Education courses which lead to licensure. Seminars with university advisors, clinical faculty, and visiting distinguished scholars punctuate the academic year to help Fellows think critically and creatively about the process of teaching and the role of education in society. The Master Teacher Associates Program is for students who are licensed and experienced teachers. It includes coursework and activities to foster extension of the candidate's development in content expertise, knowledge of learners, research expertise, connecting subject matter and learners, and professional development and leadership. The program provides concentrated study in the candidate's subject field or fields. The program extends the candidate's understanding of the basic humanistic and behavioral studies relating to teaching and learning. The

program broadens and deepens the understanding of teaching and learning theory through advanced study accompanied by multiple diverse clinical experiences. The program assists candidates in gaining greater insights and skills in the use of the techniques of research and in designing and carrying out research projects.

In addition to special features in the education programs, our counseling program began offering an online master's program fall semester 2012 in order to meet the need for counselors across the nation. Enrolled students complete the same 60-hour curriculum based on the profession's accreditation standards outlined by the Council on Accreditation of Counseling and Related Educational Programs. Student learning outcomes are monitored for comparison across courses.
