

# Tips to Teach Children About Finances

*Start when they are young. As early as pre-kindergarten, you can begin to:*

- Give your child a small allowance for chores.
- Teach your child how to save. Many banks and credit unions provide accounts for children. Show your child how to add their deposits in their “savings book.”
- Give your child a simple piggy-bank to encourage saving.
- Teach your child the difference between needs and wants.
- Talk to your child about giving and sharing with others.
